

## National Service Days 2021-2022

National Service Day events and activities should be related to volunteerism, celebrated across the country and related to the spirit and intention of the day (i.e. research the history and traditions of the service day). These National Service Day events remind members that they are part of a national network of programs and allow them to work with community volunteers, other AmeriCorps members and other national service participants. Members are always encouraged to volunteer within the community, and occasionally there are volunteer opportunities with other awareness events, however these activities may not count as a National Service Day and if not related to their service priorities, may not be an appropriate use of their service hours. These National Service Days are subject to change. ***If possible, please send us pictures or media with the information you provide in your progress report.***
